Option 2

- Hourly Service
- Minimum of 2 Detail Cleaners
- Minimum of 4 hours

What we won't do

- ⊗ Light Cleaning
- ⊗ Sweep (this just moves contaminants around)
- ⊗ Cross contaminate (spread germs)
- ⊗ Use non HEPA filtration vacuums (we don't want anything going back into the air)
- ⊗ Use every day toxic cleaning products
- ⊗ Use cotton mops (certain products are neutralized when in contact with cotton)
- ⊗ Use sponges or paper towels (these materials are ineffective at removing germs from surfaces)
- ⊗ Clean around furniture
- ⊗ Not achieve dwell time to insure sanitization has been achieved
- ⊗ Provide unprofessional, sloppy work

*HEPA: Filter for vacuum that captures fine particles that most vacuums can't

*Dwell time: Time it takes products to kill germs

*Cross-contamination: Transferring germs from one surface to another

Basic Weekly Service: Green Cleaning & Home Sanitizing
